

## Environmental And Sustainability Policy

Here at Oil Salvage Limited we are committed to achieving the best Environmental and Sustainability performance possible. Oil Salvage has a “A GREENER VISION” with our state-of-the-art UK based waste oil re-refining facility we can close the loop on the circular economy within the waste oil industry.

### Policy Statement

Our Environmental and Sustainability Policy begins with the consideration and assessment of our impact on both the local and wider environment and communities, we acknowledge our responsibility to protect the environment and are committed to conducting our business in an environmentally responsible manner, this is at the heart of our business, as such we consider the transportation or raw materials, energy usage, process efficiency, distribution of finished products, discharge of emissions and disposal of waste. Sustainability is at the core of our operations. We strive to balance economic, environmental, and social factors to ensure long-term viability, we are dedicated to promoting the circular economy by transforming waste oil into reusable products.

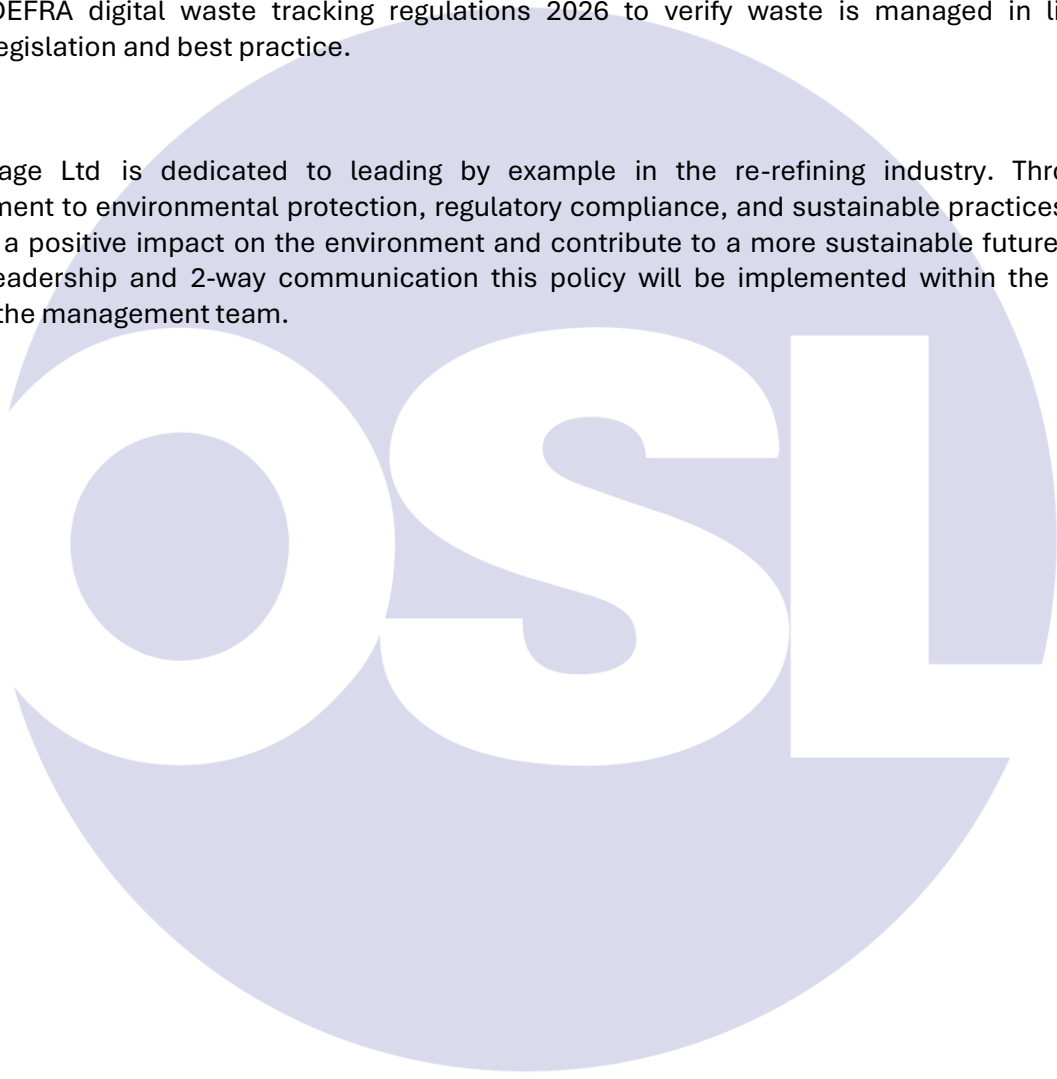

### Oil Salvage Ltd therefore have the following commitments and objectives to: -

- Minimize disturbance to the local and wider environment and to the quality of life of the local communities.
- Invest in energy-efficient plant and equipment and use best practices to reduce our energy consumption.
- We will comply with and where possible exceed all applicable environmental legislation, regulations, and standards.
- We will actively monitor changes in legislation and adjust our policies and procedures to ensure ongoing compliance.
- We aim to reduce our environmental impact through efficient use of resources and the implementation of best practices in waste oil re-refining.
- Employ state-of-the-art pollution control technologies to minimize emissions to air and water.
- Develop and maintain emergency response plans to address accidental releases and mitigate potential environmental impacts.
- Through the planning and design stage of any new equipment we will meet the Best Available Technique (BAT) standards.

PO5	Environmental And Sustainability Policy			V1.6	17 <sup>th</sup> June 2026

- Conduct regular audits and reviews of our environmental performance and management system.
- Maintain an open and honest relationship with our local community and regulatory bodies.
- The Circular Economy is a top priority for Oil Salvage Ltd, and we are closing the loop on waste materials within the UK by working in line with the government’s 25-year Environmental plan.
- Ensure waste is collected, transported and processed to meet the requirements of the DEFRA digital waste tracking regulations 2026 to verify waste is managed in line with legislation and best practice.

Oil Salvage Ltd is dedicated to leading by example in the re-refining industry. Through our commitment to environmental protection, regulatory compliance, and sustainable practices, we aim to make a positive impact on the environment and contribute to a more sustainable future, through visible leadership and 2-way communication this policy will be implemented within the business through the management team.

This policy will be reviewed annually and updated as necessary to reflect our ongoing commitment to environmental and sustainability goals.
